PROFESSIONAL SUMMARY

Frontend Developer with professional experience building React.js and TypeScript applications for business operations, examination management, and responsive websites. Experienced in developing production UI workflows, integrating REST APIs, implementing billing logic, and supporting an offline-first desktop application using Electron.js. Skilled in manual feature testing, troubleshooting, and technical documentation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React.js, HTML5, CSS3

UI Libraries: Tailwind CSS, Bootstrap, React Hook Form

Desktop Applications: Electron.js

API Integration: REST APIs, Axios

Tools: Vite, Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Frontend Developer | Youngminds Technology Solutions Pvt. Ltd. | December 2024 – July 2026

PastryChef ERP — Offline-First POS Application

- Developed React.js and TypeScript cashier modules for an Electron-based ERP application used across 3 outlets, handling approximately 100–200 transactions per day.
- Implemented core billing workflows, including tax calculations, discount distribution, payment handling, barcode scanning, customer lookup, and order cancellation.
- Built product and stock-dependent billing functionality, including product variants, add-ons, and product availability workflows.
- Implemented UI handling for offline sales synchronization, including sync-status indicators and error handling for local-to-server data synchronization.
- Performed manual testing and troubleshooting of implemented workflows and documented technical processes.

ETC Mentors — Examination Management Platform

- Developed administration modules for student and college registration, exam creation and scheduling, reporting, and result management.
- Built role-based dashboards and UI workflows supporting live and scheduled examinations, integrating REST APIs for examination-related data flows.

Business, Educational and Corporate Websites

- Developed responsive websites and admin panels using React.js, JavaScript, HTML, CSS, Bootstrap, and Tailwind CSS.
- Implemented events, galleries, faculty information, forms, and dynamic content updates; integrated REST APIs for customer, reporting, examination, and content-management workflows.

Business Process Associate | Accenture | August 2023 – November 2024

- Built a foundation in client communication, process-driven problem-solving, and detail-oriented delivery before transitioning into frontend development.

PROJECTS

Fairy of Nail & Lash — Salon Website

- Developed a responsive salon website using React.js, JavaScript, and Tailwind CSS to present services and gallery content.
- Implemented booking-related UI flows and a WhatsApp handoff for appointment enquiries.

CERTIFICATION

React.js Frontend Development — AchieversIT, Bangalore

EDUCATION

Bachelor of Commerce (Computer Applications) | Sri Venkateswara University | CGPA: 8.60
